ABSTRACT:

PROBLEM TO BE SOLVED: To provide a high-luster Al-Zn alloy plated steel sheet excellent in light reflectivity, having beautiful spangle, and excellent in design characteristic, and its manufacturing method.

SOLUTION: In the high-luster Al-Zn alloy plated steel sheet, the plating layer has a composition consisting of, by weight, 25-70% Al, 1.0-2.0% Si and the balance Zn and coating weight is regulated to
